Health and Safety Policy

Until such time as the Fairlight Pavilion is built and handed over to the Fairlight Pavilion Management Committee, health and safety is the responsibility of our Principle Designers, Tennyson Suite who will oversee the contractors once appointed.

The Management Committee once in control of the building will replace this with a robust Health and Safety policy **before** the building comes into use.

To be reviewed on completion of Fairlight Pavilion

Date originally adopted by the Management Committee: 4th April 2024
